# Mental Math: Adding and Subtracting Tens

You can group by tens to find how many.

Look at this bar graph.  
Answer each question.

- 1** How many people voted for carousel?

\_\_\_\_\_ = \_\_\_\_\_ tens

- 2** How many people voted for roller coaster?

\_\_\_\_\_ = \_\_\_\_\_ tens

- 3** How many more people voted for carousel than roller coaster?

\_\_\_\_\_ tens – \_\_\_\_\_ tens = \_\_\_\_\_ tens = \_\_\_\_\_

- 4** How many people voted for carousel or roller coaster?

\_\_\_\_\_ tens + \_\_\_\_\_ tens = \_\_\_\_\_ tens = \_\_\_\_\_

- 5** Two bars are the same height. What does that tell you?

\_\_\_\_\_

## INDEPENDENT PRACTICE

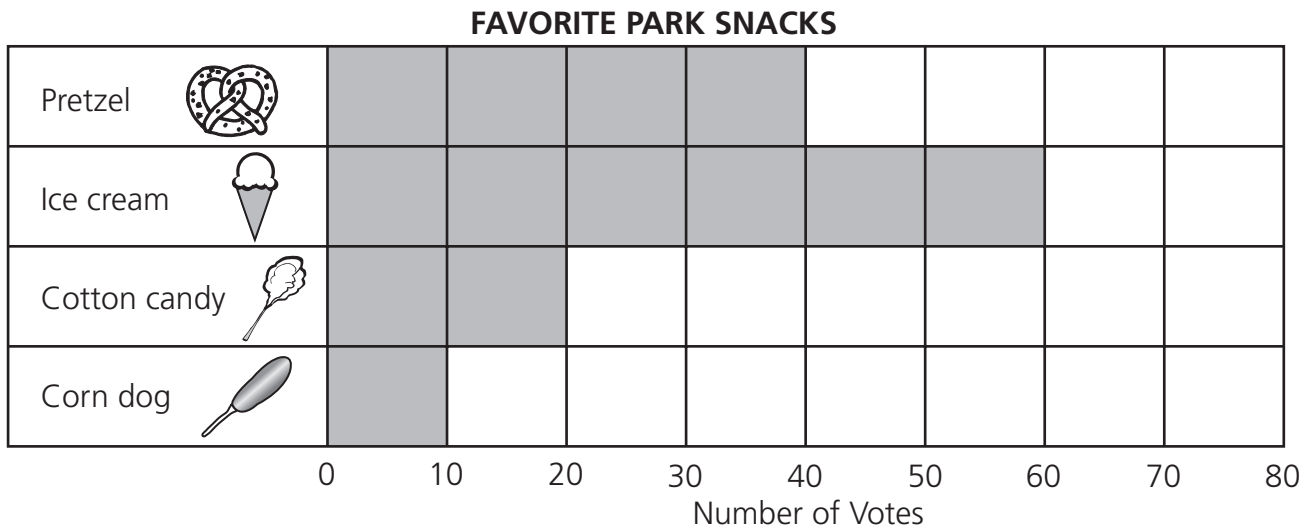

Use the graph above to answer the question.

- 6** How many more people voted for Ferris wheel than bumper cars?

\_\_\_\_\_ – \_\_\_\_\_ = \_\_\_\_\_

\_\_\_\_\_ people

Use the bar graph to answer each question.

- 7 How many people voted for pretzel? \_\_\_\_\_
- 8 Which has more votes—pretzel or ice cream? \_\_\_\_\_  
How many more votes? \_\_\_\_\_
- 9 How many people voted for cotton candy or pretzel? \_\_\_\_\_
- 10 How many more people voted for pretzel than corn dog? \_\_\_\_\_
- 11 Complete: One block on the graph means \_\_\_\_\_ votes.  
How could you find how many people voted in all?  
\_\_\_\_\_
- 12 Meg says corn dog has only one vote. Explain Meg's mistake.  
\_\_\_\_\_  
\_\_\_\_\_
- 13 Corn dog gets 30 more votes. Color the bar in the graph to show this.  
How many votes does corn dog have now? \_\_\_\_\_
