

Why does a bat have big ears?

Bats live in dark places.
They can not see well in the dark.
But most bats have big ears.
The ears help the bat fly.

The bat makes a sound.
The sound hits the wall.
An echo comes back.
Then the bat can tell where it is.
It can fly in the dark.
And it will not bump into things.

Circle the letter for the right answer.

1. This story tells how bats _____.
a fly **b** sleep **c** eat
2. A bat can not _____ very well.
