# Going to the Moon

**The Crew**

Neil became part of a special crew.

Neil, Buzz, and Michael would fly *Apollo 11*.

They would fly to the moon.

No one had ever been there before.

After four days in space, the crew reached the moon.

Michael stayed in the spaceship.

Neil and Buzz got into a small spacecraft.

They used it to land on the moon.

*The spacecraft that landed on the moon was called the Eagle.*
