Using a Map Grid on a Street Map

To help you find the places you are looking for, most maps have a **grid**. The grid divides the map into small spaces. Letters name the spaces from top to bottom. Numbers name the spaces from left to right. You can name the space in

which a place is located by putting the letter and the number together. On the map of San Francisco below, for example, Balboa Park is in space D-2. To find it, you look across the spaces marked D and down the spaces marked 2.

Study the map and its grid. Then circle the correct grid space to complete each sentence below.

- | | | | | |
|---|-----|-----|-----|-----|
| 1. Fisherman's Wharf is in space _____. | A-3 | B-1 | C-4 | D-2 |
| 2. Harding Park is in space _____. | A-2 | B-4 | C-3 | D-1 |
| 3. The U.S. Mint is in space _____. | A-1 | B-3 | C-2 | D-3 |
| 4. Hunters Point is in space _____. | A-4 | B-2 | C-1 | D-4 |
| 5. Twin Peaks Park is in space _____. | A-3 | B-4 | C-2 | D-1 |
| 6. City Hall is in space _____. | A-4 | B-3 | C-1 | D-2 |

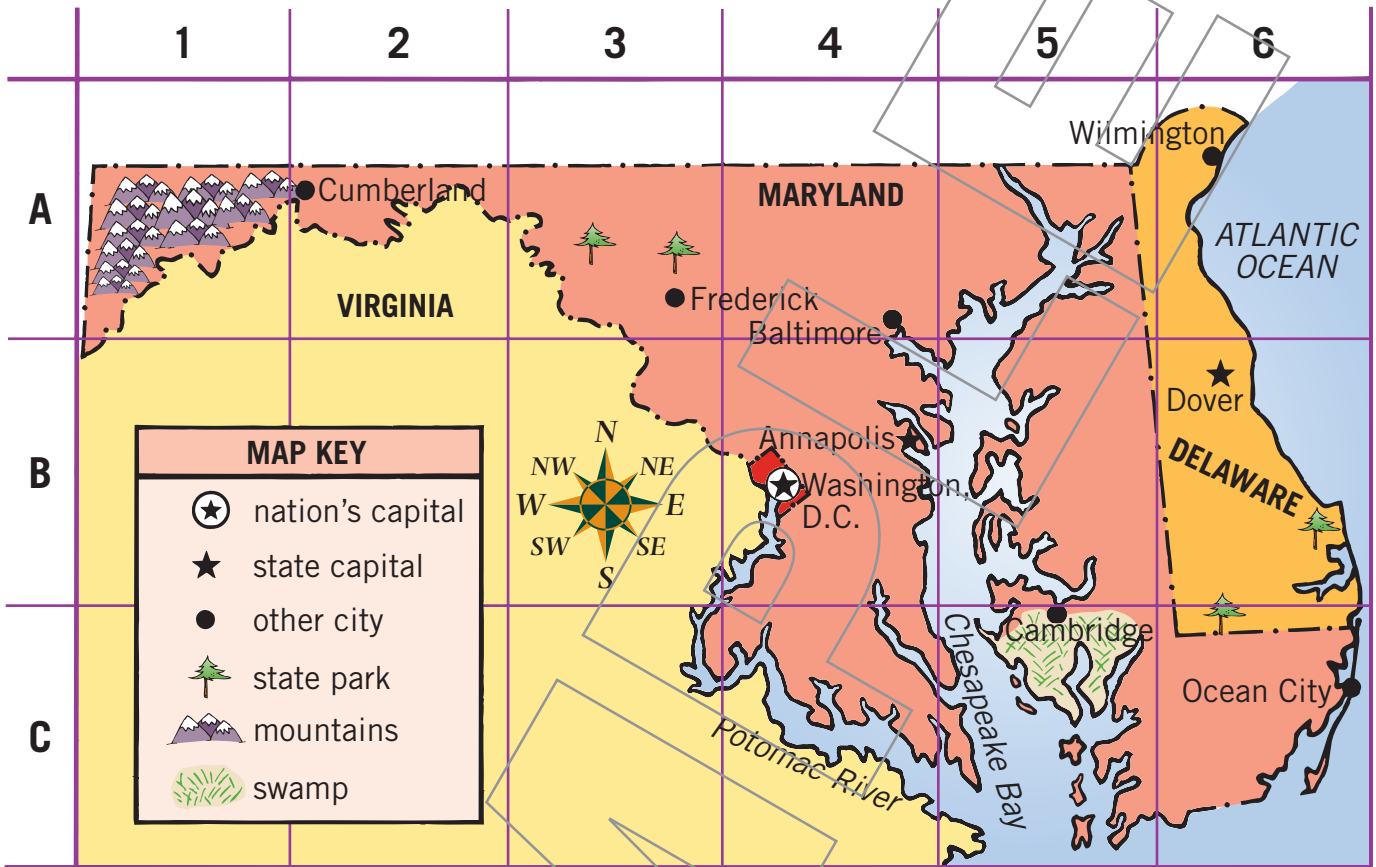

The letter and number that follow each place listed below tell the map grid space where the place can be found. Find and circle each place on the map.

- | | | |
|---------------------------|--------------------------|---------------------------------|
| 7. Golden Gate Bridge A-2 | 9. Mt. Davidson Park D-2 | 11. The Embarcadero A-4 and B-4 |
| 8. Mission Dolores C-3 | 10. Lincoln Park B-1 | 12. Telegraph Hill A-3 |

Using a Map Key and a Grid on a Map

You can find places on a map quickly and easily when you use a map key and a grid together.

Study the map of the states of Maryland and Delaware above. Then answer each question below.

1. What city is shown on the map in grid space A-3? _____
2. What city is shown in grid space C-6? _____
3. What city is shown in grid space A-4? _____
4. What city is shown in grid space A-6? _____
5. What symbol is used for mountains on the map? _____
6. What symbol is used for a state park on the map? _____
7. What city is shown at the eastern edge of a mountain range? _____
In what grid space is that city? _____
8. What city is north of a swamp in grid space C-5? _____
9. In what grid space is the nation's capital? _____ What is the name of that capital?

10. In what grid space is the capital of Maryland? _____
11. In what grid space is the capital of Delaware? _____
12. What grid space has two state parks? _____
