# Perimeter

Perimeter is the distance around a figure.  
Add to find the perimeter (P) of each figure.

$$P = 2 + 7 + 2 + 7$$

$$P = 18 \text{ m}$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

$$P =$$

# Perimeter—Rectangles

The perimeter of a rectangle is  $(2 \times \text{length}) + (2 \times \text{width})$ .  
 The formula for this is written  $P = (2 \times l) + (2 \times w)$ .  
 Use the formula to find the perimeter of each rectangle.

$$P = (2 \times l) + (2 \times w)$$

$$P = (2 \times \underline{6}) + (2 \times \underline{3})$$

$$P = \underline{12} + \underline{6}$$

$$P = \underline{18} \text{ cm}$$

$$P = (2 \times l) + (2 \times w)$$

$$P = (2 \times \underline{\quad}) + (2 \times \underline{\quad})$$

$$P = \underline{\quad} + \underline{\quad}$$

$$P = \underline{\quad} \text{ km}$$

$$P = (2 \times l) + (2 \times w)$$

$$P = (2 \times \underline{\quad}) + (2 \times \underline{\quad})$$

$$P = \underline{\quad} + \underline{\quad}$$

$$P = \underline{\quad} \text{ m}$$

**3.**  $l = 10 \text{ km}, w = 9 \text{ km}$

**4.**  $l = 54 \text{ m}, w = 24 \text{ m}$

**5.**  $l = 15 \text{ cm}, w = 7 \text{ cm}$

**6.**  $l = 28 \text{ cm}, w = 36 \text{ cm}$

**7.**  $l = 9 \text{ km}, w = 6 \text{ km}$

**8.**  $l = 100 \text{ m}, w = 75 \text{ m}$

Find the answer to each word problem.

**9.** A pasture is a rectangle 50 meters long and 39 meters wide. What is the perimeter of the pasture?

**10.** A cat door is a rectangular flap over a hole cut in a door. The cat door is 22 centimeters high and 16 centimeters wide. What is the perimeter?

# Perimeter—Squares

The perimeter of a square is  $4 \times \text{side}$ .  
The formula for this is written  $P = 4 \times \text{side}$ .  
Use the formula to find the perimeter of each square.

S

$$P = 4 \times s$$

$$P = 4 \times \underline{5}$$

$$P = \underline{20} \text{ m}$$

1.

$$P = 4 \times s$$

$$P = 4 \times \underline{\quad}$$

$$P = \underline{\quad} \text{ cm}$$

2.

$$P = 4 \times s$$

$$P = 4 \times \underline{\quad}$$

$$P = \underline{\quad} \text{ m}$$

3.  $s = 2 \text{ km}$

4.  $s = 12 \text{ cm}$

5.  $s = 60 \text{ mm}$

6.  $s = 35 \text{ m}$

7.  $s = 96 \text{ cm}$

8.  $s = 9.2 \text{ km}$

Find the answer to each word problem.

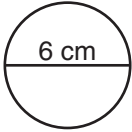

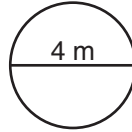

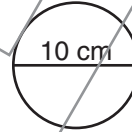

9. The entrance to an attic is a square hole 80 centimeters on each side. What is the perimeter of the hole?

10. A sidewalk surrounds a square building that measures 125 meters on each side. What is the perimeter of the building?

# Circumference of a Circle

The circumference of a circle is the distance around it. It is equal to pi ( $\pi$ ) times the diameter of the circle. Pi is a special number that is close to 3.14. The formula is written  $C = \pi \times d$  or  $C = 3.14 \times d$ .

Use the formula to find the circumference of each circle.

<p><b>S</b></p>  <p><math>C = \pi \times d</math>  <math>C = 3.14 \times \underline{6}</math>  <math>C = \underline{18.84}</math> cm</p>	<p><b>1.</b></p>  <p><math>C = \pi \times d</math>  <math>C = 3.14 \times \underline{\quad}</math>  <math>C = \underline{\quad}</math> m</p>	<p><b>2.</b></p>  <p><math>C = \pi \times d</math>  <math>C = 3.14 \times \underline{\quad}</math>  <math>C = \underline{\quad}</math> cm</p>
---	---	--

Find the circumference of each circle. Remember, the diameter is 2 times the radius ( $r$ ).

<p><b>S</b></p> <p><math>r = 4</math> cm  <math>C = \pi \times d</math>  <math>C = 3.14 \times \underline{8}</math>  <math>C = \underline{25.12}</math> cm</p>	<p><b>3.</b></p> <p><math>r = 8</math> m</p>	<p><b>4.</b></p> <p><math>r = 10</math> cm</p>
--	--	--

Find the circumference of each circle. Use the diameter or radius given.

- |                       |                       |                          |
|-----------------------|-----------------------|--------------------------|
| <b>5.</b> $d = 2$ cm  | <b>6.</b> $r = 7$ km  | <b>7.</b> $d = 12$ mm    |
| <b>8.</b> $r = 2.5$ m | <b>9.</b> $d = 5.5$ m | <b>10.</b> $r = 1.75$ cm |

Find the answer to each word problem.

- |  |   |
|--|---|
| <p><b>11.</b> A circular fountain has a diameter of 3 meters. What is the circumference of the fountain?</p> | <p><b>12.</b> A wheel has a radius of 28 centimeters. What is the circumference of the wheel?</p> |
|--|---|

# Problem Solving: Perimeter and Circumference

Find the answer to each word problem.

1. A poster is 71 centimeters long and 56 centimeters wide. How much tape does Salim need to cover its edges?
2. Mr. Han's backyard is a square 25 meters on a side. How much fencing would he need to completely surround the backyard?
3. A dinner plate has a diameter of 20 centimeters. What is the circumference of the plate?
4. The football team jogged once around the football field. If the field is 110 meters long and 49 meters wide, how far did the team jog?
5. Ms. Cohen walks around the edge of a square park that is 300 meters long on a side. How far does she walk?
6. A traffic circle has a radius of 5.25 meters. What is the circumference of the traffic circle?
7. Inez is building a pen for her pet rabbit. The pen is 2 meters long and 1.5 meters wide. What is the perimeter of the pen?
8. A field of corn is 0.75 kilometer long and 0.35 kilometer wide. What is the perimeter of the field?
