GLOSSARY	62

Your child may not be able to pay attention very well, even for a short period of time. As a result, it is difficult for her to follow directions or to complete a task.

Your child may have trouble sorting and understanding sounds. She *tries* to listen when you talk. But your child is hearing so many sounds at the same time that she doesn't know which ones are important. Your child may also find it difficult to connect certain sounds with the things that make them.
