# What is the Grand Canyon?

The Grand Canyon is a very big, deep hole.  
It goes down into the earth.  
The sides of the Grand Canyon are rock.  
There is a river at the bottom.

Many people come to see the Grand Canyon.  
You can hike down the sides.  
Or you can ride down on a mule.  
At the bottom there is a long bridge over the river.

Some people set up tents and camp there.  
You can swim and fish in the river.  
There is even a train to take you around.
