Telling Time: Hour	36		

Time can also mean a specific point during the day. We describe this kind of time using hours, minutes, and seconds. We use special **tools** to tell time.

A **clock** tells the time of day. Some clocks are very big. Some clocks hang on the wall. Some clocks sit on a desk. Look at these clocks.

A **watch** also tells the time of day. A watch is a small clock that a person can wear. Some people wear a watch on their wrist. Some people keep a watch in their pocket. Look at these watches.

Can you find something that tells time in your classroom?

Draw an X on the things that tell time.
