Marks: 1

What causes deserts? One kind of desert is caused by mountains. When sea water evaporates into water vapor, the water vapor forms rain clouds. Sometimes, tall mountain ranges get in the way of rain clouds. When the rain clouds pass over the mountains, they rise and are cooled. Then rain begins to fall. But the rain falls on the sea side of the mountains. After the rain, the winds that pass over the desert lands are dry. On one side of the mountains, there is rain. On the ____ side of the mountain, there is none.
